LENS TECHNOLOGY

Sigma lens technology enables the photographer to express his own sensitivity through images.

Sigma has refined optical technology, in order to fully realize the possibilities of single lens reflex cameras and to respond exactly to the demands of the photographer, helping him to bring his visions to reality.

■ The high quality lens series of Sigma.

DC (Digital Camera) Lenses:

DC for DIGITAL

For these special digital single-lens reflex camera lenses, the image circle has been designed to match the image elements which correspond to the APS-C size. The original technology gathered during the development of the SD series of digital singe-lens reflex cameras has been used to realize optical abilities most suitable for digital images. This high-performance lens series combines the technologies and know-how for lens power arrangement, coating design, etc., accumulated during long years of developing interchangeable lenses for single-lens reflex cameras, with up-to-date digital image technology. Reduction of the image circle diameter makes it possible to reduce the size and the weight of the lens, and contributes widely to the handling characteristics at the time of taking pictures.

* Use is not possible for digital single-lens reflex cameras with image elements larger than the APS-C equivalent size, 35 mm single-lens reflex cameras, and APS film single-lens reflex cameras. In case of such use, vignetting occurs on the screen and in the resulting images.

DG (Digital) Lenses:

DG for DIGITAL

The most suitable lenses for 35 mm film single-lens reflex cameras, as well as for digital SLR cameras. Sigma's development of the DG (Digital) range of lenses has concentrated on the correction of distortion and aberrations. Magnification of chromatic aberration is particularly conspicuous with digital cameras. The optical designs and cutting-edge technology incorporated by Sigma eliminate flare and ghosting from the image sensor and create excellent color balance. Vignetting is minimized whilst marginal illumination is ensured. These high performance lenses are equally suited for digital and analogue cameras.

■ SIGMA Advanced Lens Technology.

EX Lens:

EX

The excellent features of these Sigma lenses, such as new optical and mechanical design concept, superior performance, perfect handling, ultra compact design, durability etc., are symbolized by the EX mark.

Aspherical Lens:

ASP.

The aspherical lens complex allows freedom of design, improved performance, a reduced number of component lenses and a compact size.

APO Lens:

APO

In order to attain the highest quality images, the APO lens has been made using Special Low-Dispersion (SLD) glass and is designed to minimize color aberration.

Optical Stabilizer (OS):

OS

This function utilizes a built-in mechanism that compensates for camera shake. It dramatically expands photographic possibilities by alleviating camera movement when shooting hand held.

Hyper-Sonic Motor (HSM):

HSM

This lens uses a motor driven by ultrasonic waves to provide a quiet, high-speed AF.

Rear Focus:

RF

This lens is equipped with a system that moves the rear lens group for high-speed, silent focusing.

Inner Focus:

IF

To ensure stability in focusing, this lens moves the inner lens group or groups without changing the lens' physical length.

Conv. (APO Teleconverter EX):

CONV.

This lens can be used with the APO Teleconverter EX. It can increase the focal length and will interface with the camera's AE (automatic exposure) function.

18-200 mm F3.5-6.3 DC

DC LENS FOR DIGITAL SLR CAMERA

Pursuing the pleasure of photography in a technological age. Lenses especially designed and optimized to complement the characteristics of digital cameras. Reducing the size of the image circle improves the image quality of digital SLRs and makes a lightweight and compact construction possible.

17-70 mm F2.8-4.5 DC MACRO

DC FOR DIGITAL

10-20mm F4-5.6 EX DC
10-20mm F4-5.6 EX DC HSM

EX ASP. IF HSM

- Lens Construction; 10 Groups, 14 Elements
- Minimum Focusing Distance; 24 cm (9.4 in.)
- Magnification; 1:6.7 •Filter Size; ø 77 mm

This is an ultra-wide zoom lens for digital SLR camera use only. SLD glass is used for superior correction of magnification and chromatic aberrations. And, aspherical lens elements are used not only to obtain maximum correction for distortion and various aberrations, but also to display high image quality throughout the entire zoom range. Equipped with HSM, this lens makes fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus. The lens has a minimum focusing distance of 24 cm (9.4 inches) throughout the entire zoom range.

* The angles of view will vary, depending on which camera model the lens is used with.

DC FOR DIGITAL

17-70mm F2.8-4.5 DC MACRO

ASP. IF

- Lens Construction; 12 Groups, 15 Elements
- Minimum Focusing Distance; 20 cm (7.9 in.)
- Magnification; 1:2.3 •Filter Size; ø 72 mm

This is a large-aperture standard zoom lens for digital cameras, that provides wide angle and telephoto capabilities. This lens has a minimum focusing distance of 20 cm (7.9 inches) throughout the zoom range, and a maximum reproduction ratio of 1:2.3. It covers the most frequently used focal lengths, and it makes an F2.8 open aperture (at 17 mm setting) a reality. Because of its power distribution and optimized coatings, this lens reduces flare and ghost images. The use of SLD (Special Low Dispersion) glass and aspherical lenses was adopted to provide excellent correction for all types of aberration.

* The angles of view will vary, depending on which camera model the lens is used with.

●In the drawing of the lens composition, the symbols mean the following: ● : Aspherical lens ● : SLD glass ● : ELD glass.
* Product pictures show Sigma SA mount lenses; appearance of the product may be different depending on the mount type.

10-20 mm F4-5.6 EX DC HSM

NEW **DC** for DIGITAL
18-50mm F2.8 EX DC MACRO

EX ASP. IF

•Lens Construction; 13 Groups, 15 Elements
•Minimum Focusing Distance; 20 cm (7.9 in.)
•Magnification; 1:3 •Filter Size; ø 72 mm

This is a large-aperture standard zoom lens for digital camera use only, with an open-aperture value of F2.8 throughout the entire zoom range. SLD glass, ELD glass, and aspherical lenses enable this lens to be housed in a compact size and also maximize its performance. A Super Multi-Layer Coating minimizes the occurrence of flare and ghosting. The lens ensures superior peripheral brightness bright image with little vignetting. It has a minimum focusing distance of 20 cm (7.9 inches) throughout the entire zoom range and a maximum magnification of 1:3.0, which is very convenient for close-up photography.

* The angles of view will vary, depending on which camera model the lens is used with.

DC for DIGITAL
18-50mm F3.5-5.6 DC

ASP.

•Lens Construction; 8 Groups, 8 Elements
•Minimum Focusing Distance; 25 cm (9.8 in.)
•Magnification; 1:3.5 •Filter Size; ø 58 mm

This zoom lens was specially designed to suit the characteristics of digital cameras. The image circle was designed to match the size of the image sensors of most digital SLR cameras, and this has resulted in a compact, lightweight lens. The use of aspherical lenses provides correction for various aberrations and makes high-quality images a reality throughout the entire zoom range. The lens has a minimum focusing distance of 25 cm (9.8 inches) at all focal lengths and is capable of macro photography with a maximum close-up photography magnification of 1:3.5.

* The angles of view will vary, depending on which camera model the lens is used with.

DC for DIGITAL
18-200mm F3.5-6.3 DC

ASP. IF

•Lens Construction; 13 Groups, 15 Elements
•Minimum Focusing Distance; 45 cm (17.7 in.)
•Magnification; 1:4.4 •Filter Size; ø 62 mm

This is a high-performance 11.1X zoom lens for digital SLR camera use only. SLD glass and aspherical lens elements, enable this extended range zoom lens to be housed in a compact and lightweight construction and offers high image quality throughout the entire zoom range. The new lens coatings reduce flare and ghost. The minimum focusing distance of 45 cm (17.7 inches) throughout the entire zoom range allows a maximum reproduction ratio of up to 1:4.4. It also has an inner focus system, so it accepts a Petal-type hood, as well as a circular polarizing filter.

* The angles of view will vary, depending on which camera model the lens is used with.

DC for DIGITAL
AP0 50-150mm F2.8 EX DC HSM

EX APO IF HSM CONV.

•Lens Construction; 14 Groups, 18 Elements
•Minimum Focusing Distance; 100 cm (39.4 in.)
•Magnification; 1:5.3 •Filter Size; ø 67 mm

It is compact and lightweight, with a weight of 780 g (27.5 oz.), a maximum diameter of 76.3 mm (3 inches), and a length of 132.6 mm (5.2 inches) for Nikon. The latest optical technologies are condensed into this lens for the utmost correction of various aberrations and the minimum occurrence of flare and ghosting. The lens has a minimum focusing distance of 1m (39.4 inches). The HSM-equipped model makes fast AF speeds and quiet shooting a reality, and it also has full-time manual focus override. The lens also accepts designated Tele Converters, available as an optional accessory.

* The angles of view will vary, depending on which camera model the lens is used with.

30mm F1.4 EX DC
30mm F1.4 EX DC HSM

EX ASP. HSM

•Lens Construction; 7 Groups, 7 Elements
•Minimum Focusing Distance; 40 cm (15.7 in.)
•Magnification; 1:10.4 •Filter Size; ø 62 mm

This is a large-aperture standard lens for digital cameras, with a fast F1.4 aperture. SLD (Special Low Dispersion) and ELD (Extraordinary Low Dispersion) glass elements are used to obtain the best possible correction for magnification and chromatic aberrations, which are particular problems for digital cameras. The aspherical lens element delivers superior image quality, with sharp, vivid images across the entire focusing range. Equipped with HSM, this lens makes fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus.

* The angles of view will vary, depending on which camera model the lens is used with.

NEW **DC** for DIGITAL
18-200mm F3.5-6.3 DC OS

ASP. IF OS

•Lens Construction; 13 Groups, 18 Elements
•Minimum Focusing Distance; 45 cm (17.7 in.)
•Magnification; 1:3.9 •Filter Size; ø 72 mm

A high-performance zoom lens for digital cameras, equipped with Sigma's own Camera Shake Compensation System OS (Optical Stabilizer). This lens allows you to enjoy taking pictures without worrying about camera shake, which is a problem when shooting with a telephoto. SLD glass and aspherical lenses are used to deliver superior correction of all types of aberrations. And with a super multi-layer lens coating, this lens cuts down on the occurrence of flare and ghost images. It has a minimum focusing distance of 45 cm (17.7in.) throughout the entire zoom range and a maximum photography magnification of 1:3.9.

* The angles of view will vary, depending on which camera model the lens is used with.

DC for DIGITAL
55-200mm F4-5.6 DC

•Lens Construction; 9 Groups, 12 Elements
•Minimum Focusing Distance; 110 cm (43.3 in.)
•Magnification; 1:4.5 •Filter Size; ø 55 mm

We took digital characteristics into consideration when designing this lens' power layout, making high-quality images a reality throughout the entire zoom range. The image circle was designed to match the size of the sensors of most digital SLR cameras, and this resulted in a compact, lightweight lens. In the field, the lens is light on its feet and ideal for shooting remote subjects.

* The angles of view will vary, depending on which camera model the lens is used with.

WIDE ZOOM LENS

The angle of view and perspective change, according to focal length.
A wide zoom lens is particularly suitable for a variety of applications such as architectural, landscape and travel photography. Group shots are captured with ease.

12-24 mm F4.5-5.6 EX DG ASPHERICAL HSM

17-35 mm F2.8-4 EX DG ASPHERICAL HSM

EX ASP IF HSM

•Lens Construction; 12 Groups, 16 Elements
•Minimum Focusing Distance; 28 cm (11.0 in.)
•Magnification; 1:7.1 •Filter Type; Gelatin filter

This award winning, ultra-wide zoom lens starting from 12 mm is ideal for 35 mm, as well as, digital SLR cameras. With an incredible angle of view of 122°, this lens opens up a brand-new world of photography. The HSM equipped model makes fast AF speeds and quiet shooting a reality. It also benefits from full-time manual focus. With four SLD (Special Low Dispersion) glass elements and three aspherical lenses, including two molded glass aspheric elements this lens provides the utmost correction of chromatic and other aberrations, and at the same time delivers superior image quality.

DG for DIGITAL

15-30mm F3.5-4.5 EX DG ASPHERICAL

EX ASP IF

•Lens Construction; 13 Groups, 17 Elements
•Minimum Focusing Distance; 30 cm (11.8 in.)
•Magnification; 1:6 •Filter Type; Gelatin filter

This is an ultra-wide zoom lens that covers a large wide-angle range from 15 mm to 30 mm. With a minimum focusing distance of 30 cm (11.8 inches) throughout the entire zoom range, it is an ideal lens for Digital SLR Cameras. With aspherical lenses in the front and rear lens groups, this lens has excellent correction for distortion — a particular problem for zoom lenses — and for all types of aberration, and it displays a high level of optical performance. The lens is equipped with an integral Petal-type hood to block out extraneous light.

DG for DIGITAL

17-35mm F2.8-4 EX DG ASPHERICAL
17-35mm F2.8-4 EX DG ASPHERICAL HSM

EX ASP IF HSM

•Lens Construction; 13 Groups, 16 Elements
•Minimum Focusing Distance; 27 cm (10.6 in.)
•Magnification; 1:4.5 •Filter Size; ø 77 mm

This is a large-aperture wide-angle zoom lens that cover an ultra-wide angle of view of 104°. With this lens, Sigma has achieved a minimum focusing distance of 27 cm (10.6 inches) at all focal lengths and a maximum magnification of 1:4.5. The HSM-equipped model makes fast AF speeds and quiet shooting a reality, and it also features full-time manual focus. With one SLD (Special Low Dispersion) glass element and two aspherical lenses, this lens provides excellent correction for distortion as well as all types of aberration.

DG for DIGITAL

20-40mm F2.8 EX DG ASPHERICAL

EX ASP IF

•Lens Construction; 13 Groups, 17 Elements
•Minimum Focusing Distance; 30 cm (11.8 in.)
•Magnification; 1:4.6 •Filter Size; ø 82 mm

This is a large-aperture wide zoom lens that covers focal lengths from an ultra-wide angle range of 20 mm to a near standard lens focal length of 40 mm, with a bright maximum aperture of F2.8 throughout the entire zoom range. The lens has a minimum focusing distance of 30 cm (11.8 inches) at all focal lengths and a maximum magnification of 1:4.6. It is the ideal lens for Digital SLR Cameras. With aspherical lenses in the front and rear lens groups, the lens has excellent correction for distortion, as well as all types of aberration, and it displays a high level of optical performance.

•In the drawing of the lens composition, the symbols mean the following: (pink circle) : Aspherical lens (blue circle) : SLD glass (green circle) : ELD glass.
* Product pictures show Sigma SA mount lenses; appearance of the product may be different depending on the mount type.

WIDE LENS

A wide angle of view and a short shooting distance produce pictures filled with individuality. Bold composition, extreme perspective and personal expression are indicative of these wide angle lenses.

20 mm F1.8 EX DG ASPHERICAL RF

DG FOR DIGITAL

20mm F1.8 EX DG ASPHERICAL RF

EX ASP RF

- Lens Construction; 11 Groups, 13 Elements
- Minimum Focusing Distance; 20 cm (7.9 in.)
- Magnification; 1:4 •Filter Size; ø 82 mm

This 20 mm super-wide-angle lens offers an angle of view of 94.5° and a large aperture of F1.8. It allows close-ups with a minimum focusing distance of less than 20 cm (7.9 inches) and a working distance lens to subject of 6.5 cm (2.6 inches). The use of aspherical lens elements effectively compensates for distortion, spherical aberration, and astigmatism. With minimal vignetting, superior peripheral brightness is ensured. The rear focus system eliminates the need for the front of the lens to rotate, thus allowing the use of a “Petal-type hood.”

DG FOR DIGITAL

24mm F1.8 EX DG ASPHERICAL MACRO

EX ASP

- Lens Construction; 9 Groups, 10 Elements
- Minimum Focusing Distance; 18 cm (7.1 in.)
- Magnification; 1:2.7 •Filter Size; ø 77 mm

This large-aperture wide-angle lens has a maximum magnification of 1:2.7. The use of a floating focus system enables a minimum shooting distance of 18 cm (7.1 inches). With minimal vignetting, superior peripheral brightness is ensured. Two aspherical lens elements help compensate for distortion and aberrations. This lens’ focus system incorporates a linear-motion and a non-rotating front barrel, and is supplied with a “Petal-type hood.”

15 mm F2.8 EX DIAGONAL FISHEYE

DG FOR DIGITAL

28mm F1.8 EX DG ASPHERICAL MACRO

EX ASP

- Lens Construction; 9 Groups, 10 Elements
- Minimum Focusing Distance; 20 cm (7.9 in.)
- Magnification; 1:2.9 •Filter Size; ø 77 mm

This large-aperture wide-angle lens boasts a maximum magnification of 1:2.9. Its floating focus system enables close-ups up to a minimum shooting distance lens to subject of less than 20 cm (7.9 inches). With minimal vignetting, superior peripheral brightness is ensured. Aspherical lens elements are used to compensate for distortion and aberrations. The focus mechanism employs a linear-motion focus system with a non-rotating front barrel and an easy-to-use “Petal-type hood” is provided as a standard accessory.

DG FOR DIGITAL

8mm F3.5 EX DG CIRCULAR FISHEYE

EX

- Lens Construction; 6 Groups, 11 Elements
- Minimum Focusing Distance; 13.5 cm (5.3 in.)
- Magnification; 1:4.6 •Filter Type; Gelatin filter

This circular fisheye lens creates a circular image with a 180-degree angle of view when used on a full frame digital or 35 mm film camera. It has an F3.5 open-aperture value, a minimum focusing distance of 13.5 cm (5.3 inches), and a maximum magnification of 1:4.6. It permits creative expression by allowing the production of special distorted images. Occurrence of flare and ghosting is minimized with a Super Multi-Layer Coating. SLD (Special Low Dispersion) glass is used for superior correction of chromatic aberration and excellent image quality.

* Full circle can only be captured with full frame 35 mm format digital SLR and film SLR cameras.

DG FOR DIGITAL

15mm F2.8 EX DG DIAGONAL FISHEYE

EX

- Lens Construction; 6 Groups, 7 Elements
- Minimum Focusing Distance; 15 cm (5.9 in.)
- Magnification; 1:3.8 •Filter Type; Gelatin filter

This full frame fisheye lens has an angle of view of 180° across the diagonal. It is an ideal lens for Digital SLR cameras. By taking advantage of both the distortion aberration specific to fisheye lenses and the minimum shooting distance of 15 cm (5.9 inches), the photographer can shoot creative images. This lens has an insertion-type gelatin filter holder at the rear, allowing the use of gelatin filters.

●In the drawing of the lens composition, the symbols mean the following: ● : Aspherical lens ● : SLD glass ● : ELD glass.
* Product pictures show Sigma SA mount lenses; appearance of the product may be different depending on the mount type.

28-300 mm F3.5-6.3 DG MACRO

STANDARD ZOOM LENS

A standard zoom lens is a useful first lens. The effects of a number of lenses can be obtained with this single lens. Wideangle, standard and telephoto focal lengths are all combined in one lens to produce a convenient and versatile zoom, which caters for the photographer’s creativity.

24-70 mm F2.8 EX DG MACRO

DG FOR DIGITAL 24-60mm F2.8 EX DG

EX ASP. IF

- Lens Construction; 15 Groups, 16 Elements
- Minimum Focusing Distance; 38 cm (15.0 in.)
- Magnification; 1:5.8 •Filter Size; ø 77 mm

A compact large-aperture zoom lens optimized for digital cameras. The maximum aperture F-value is 2.8 over the entire zoom range. The minimum focusing distance is 38 cm (15 inches), throughout the zoom range. Effective arrangement of SLD (Special Low Dispersion) glass provides good correction for the magnification chromatic aberration, which can become a problem especially for digital cameras. As the front barrel of the lens does not rotate at the time of focusing, attachment of a custom petal-type hood, excellent for blocking out extraneous light, is possible, and circular polarizing filters also can be used easily.

DG FOR DIGITAL 24-70mm F2.8 EX DG MACRO

EX ASP.

- Lens Construction; 13 Groups, 14 Elements
- Minimum Focusing Distance; 40 cm (15.7 in.)
- Magnification; 1:3.8 •Filter Size; ø 82 mm

Large-aperture zoom starting from 24 mm and realizing a maximum aperture F-value of 2.8. Aspheric lenses and SLD (Special Low Dispersion) glass are used to realize good correction of chromatic aberration and high-quality images. The minimum focusing distance is 40 cm (15.7 inches), over the zoom range, and macro photography with a maximum magnification of 1:3.8 also is possible. As the front element does not rotate at the time of focusing, a petal-type hood excellent for blocking out extraneous light, can be attached.

●In the drawing of the lens composition, the symbols mean the following: (pink circle) : Aspherical lens (blue circle) : SLD glass (green circle) : ELD glass.
* Product pictures show Sigma SA mount lenses; appearance of the product may be different depending on the mount type.

APO 120-300mm F2.8 EX DG HSM

DG for DIGITAL

APO 120-300mm F2.8 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 16 Groups, 18 Elements
- Minimum Focusing Distance; 150–250 cm (59.1–98.4 in.)
- Magnification; 1:8.6 •Filter Size; ø 105 mm

DG for DIGITAL

APO 170-500mm F5-6.3 DG

APO ASP. RF

- Lens Construction; 11 Groups, 13 Elements
- Minimum Focusing Distance; 300–320 cm (118.1–126.0 in.)
- Magnification; 1:6.6 •Filter Size; ø 86 mm

This digitally optimized compact apochromatic ultra-telephoto zoom lens is ideal for taking sport, nature and landscape photographs. The five group zoom and rear focus systems ensure stability and ease of use. The use of aspherical lenses reduces distortion aberration to less than 1%. Three pieces of Special Low-Dispersion (SLD) glass compensate for secondary color aberration. High image quality is obtained throughout the entire zoom range. A removable tripod collar is included as a standard component, as a tripod should be used to prevent unintentional movement.

DG for DIGITAL

APO 135-400mm F4.5-5.6 DG

APO ASP. RF

- Lens Construction; 11 Groups, 13 Elements
- Minimum Focusing Distance; 200–220 cm (78.7–86.6 in.)
- Magnification; 1:5.3 •Filter Size; ø 77 mm

This compact telephoto zoom lens is optimized for Digital SLR cameras. This lens uses one aspherical lens and three SLD (the special low dispersion) glasses for excellent correction of chromatic aberration. High image quality is assured throughout the entire zoom range. Color aberration in the secondary spectrum is compensated by using Special Low-Dispersion (SLD) glass. The five group zoom and rear focus systems ensure smooth auto focusing, stability, and ease of use. A removable tripod collar is included as a standard component, as a tripod should be used to prevent unintentional movement.

DG for DIGITAL

APO 300-800mm F5.6 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 16 Groups, 18 Elements
- Minimum Focusing Distance; 600 cm (236.2 in.)
- Magnification; 1:6.9 •Filter Size; ø 46 mm (Rear)

Specially designed for digital as well as 35 mm SLR cameras, by continuously varying the angle of view from 8.2° to 3.1°, the lens takes a lot of the footwork out of picture composition. The HSM makes for fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus. And, by adding an optional APO 1.4X Tele Converter, you can use this lens as a 420-1120 mm F8 MF ultra-telephoto zoom lens, or with a 2X Tele Converter, as a 600-1600 mm F11 MF ultra-telephoto zoom lens.

TELEPHOTO LENS

By bringing faraway objects up close, a telephoto lens helps you create high-impact photos. A telephoto lens also allows soft blurring of the background due to the shallower depth of field.

APO 500 mm F4.5 EX DG HSM

DG for DIGITAL

APO 500mm F4.5 EX DG
APO 500mm F4.5 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 8 Groups, 11 Elements
- Minimum Focusing Distance; 400 cm (157.5 in.)
- Magnification; 1:7.7 •Filter Size; ø 46 mm (Rear)

This is a large-aperture 500 mm lens that is ideal for digital cameras. ELD glass is used to deliver high contrast and high resolution across the entire aperture range. The lens housing accommodates a rear insertion type filter. The HSM makes fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus. And, by adding an optional APO 1.4X Tele Converter, you can use this lens as a 700 mm F6.3 MF lens, or with a 2X Tele Converter, as a 1000 mm F9 MF lens.

DG for DIGITAL

APO 300mm F2.8 EX DG
APO 300mm F2.8 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 9 Groups, 11 Elements
- Minimum Focusing Distance; 250 cm (98.4 in.)
- Magnification; 1:7.5 •Filter Size; ø 46 mm (Rear)

Ideal for digital as well as 35 mm SLR cameras, this lens has ELD glass elements in the front lens group for sharp, high-contrast images. Its inner focus system makes focusing a snap. The HSM makes for fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus. The lens takes a rear insertion type filter with its own revolving ring, as well as a circular polarizing filter. And, with the addition of an optional APO Tele Converter, the lens is still capable of high-speed auto focus.

DG for DIGITAL

APO 800mm F5.6 EX DG
APO 800mm F5.6 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 9 Groups, 12 Elements
- Minimum Focusing Distance; 700 cm (275.6 in.)
- Magnification; 1:8.8 •Filter Size; ø 46 mm (Rear)

This is a large-aperture 800 mm lens that is ideal for digital as well as 35 mm SLR cameras. ELD glass elements are used in the front lens group to deliver high contrast and high resolution across the entire aperture range. The lens housing accommodates a rear insertion type filter. The HSM makes fast AF speeds and quiet shooting a reality, and it is also capable of full-time manual focus. And by adding an optional APO 1.4X Tele Converter, you can use this lens as a 1120 mm F8 MF lens, or with a 2X Tele Converter, as a 1600 mm F11 MF lens.

•In the drawing of the lens composition, the symbols mean the following: (pink circle): Aspherical lens (blue circle): SLD glass (green circle): ELD glass.
* The appearance of a lens varies by mount.

MACRO LENS

There is beauty and drama in the minute world right on your doorstep.
Macro lenses are indispensable for the close-up photography required to detect and record these magical scenes.

MACRO 70 mm F2.8 EX DG

APO MACRO 150 mm F2.8 EX DG HSM

DG FOR DIGITAL

MACRO 50mm F2.8 EX DG

EX

- Lens Construction; 9 Groups, 10 Elements
- Minimum Focusing Distance; 18.8 cm (7.4 in.)
- Magnification; 1:1 •Filter Size; ø 55 mm

This standard macro lens uses a floating system and can take high-quality images from life-size shots to distant objects. The performance is especially suitable for digital single-lens reflex cameras. The effects of magnification chromatic aberration, a specific problem for digital cameras, is reduced, and the correction of the various aberrations up to the periphery of the image is excellent. As a screw-type round hood is used, circular polarizing filters can be used easily. An aperture of F45 for greater depth of field is also provided (F32 for Nikon and Pentax).

DG FOR DIGITAL

MACRO 70mm F2.8 EX DG

EX

- Lens Construction; 9 Groups, 10 Elements
- Minimum Focusing Distance; 25.7 cm (10.1 in.)
- Magnification; 1:1 •Filter Size; ø 62 mm

This large-aperture medium macro lens that delivers an angle of view equivalent to 70 mm in 35 mm size and 105 mm in APS-C size. A Special Low Dispersion (SLD) lens and two high refractive index SLD lenses provide excellent correction for chromatic aberration during close-up photography. “Super Multi Layer Coating” of this lens minimizes the occurrence of flare and ghosting. The floating focus system provides extremely high optical performance from infinity to 1:1 Macro. It’s the ideal lens for all close-up work as well as for landscapes and portraits.

DG FOR DIGITAL

APO MACRO 150mm F2.8 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 12 Groups, 16 Elements
- Minimum Focusing Distance; 38 cm (15.0 in.)
- Magnification; 1:1 •Filter Size; ø 72 mm

This is a telephoto macro lens that is capable of life-size shots. Its performance makes it the perfect lens for digital and 35 mm SLR cameras. SLD (Special Low Dispersion) glass is effectively used to deliver superior correction of all types of aberrations, and, it is also capable of full-time manual focus. With the addition of an APO 1.4X Tele Converter, the lens can be used as a 210 mm F4 AF lens that automatically switches to MF when the subject is less than 0.52 m (20.5 inches) away. And with a 2X Tele Converter, it can be used as a 300 mm F5.6 MF lens.

DG FOR DIGITAL

APO MACRO 180mm F3.5 EX DG

APO MACRO 180mm F3.5 EX DG HSM

EX APO IF HSM CONV.

- Lens Construction; 10 Groups, 13 Elements
- Minimum Focusing Distance; 46 cm (18.1 in.)
- Magnification; 1:1 •Filter Size; ø 72 mm

Ideal for digital as well as 35 mm SLR cameras, this is a telephoto macro lens that is capable of life-size shots. Its floating inner focus system allows high performance. SLD (Special Low Dispersion) glass is used for superior correction of all types of aberrations. The HSM models provide full-time manual focus. With the addition of an APO 1.4X Tele Converter, the lens can be used as a 252 mm AF lens that automatically switches to MF when the subject is less than 1.2 m (47.2 inches) away (models with a Sony mount or a Pentax mount are only capable of MF). And with a 2X Tele Converter, it can be used as a 360 mm MF lens.

●In the drawing of the lens composition, the symbols mean the following: ●: Aspherical lens ●: SLD glass ●: ELD glass.
* Product pictures show Sigma SA mount lenses; appearance of the product may be different depending on the mount type.

LENS KNOWLEDGE

Knowing your lenses means knowing photography.
The basics of lenses and an explanation of the technology used by Sigma to create these top quality instruments.

LENS TECHNOLOGY

•Aspherical Lens
This lens provides high optical performance while maintaining a compact size. For example, the 12-24 mm f/4.5-5.6 EX DG ASPHERICAL lens widens the range of wide-angle lenses, and it provides distortion-free images with image reproduction performance equivalent to that of a single-focal length lens. Aspherical lenses allow the production of high-quality images from compact, lightweight telephoto zoom lenses.

APO (APO Lens)
SIGMA's APO zoom lenses minimize color aberration. As the refractive index of glass depends on the wavelength of light, color aberration occurs when different colors form images at different points. This problem often occurs with telephoto lenses, but the Special Low-Dispersion (SLD) glass and Extraordinary Low Dispersion (ELD) used in SIGMA's APO lenses helps to compensate for color aberration, thereby allowing them to produce of sharp images.

•APO MACRO
Although telephoto zoom lenses can be used closer to the object than fixed focal length telephoto lenses, there is still a minimum shooting distance. SIGMA has made this minimum distance smaller and developed the zoom MACRO lens for taking close-up

photographs of the same quality as those taken with a regular MACRO lens, while maintaining the performance specific to an APO lens. Rather than carrying around the cumbersome accessories required for close-up work, the photographer can now take photographs at a magnification of 1:2 (one half lifesize) using a telephoto lens, by quickly shifting from the normal setting to the full macro setting.

•Inner and Rear Focus
Conventional focusing has normally been performed by moving either all lens groups as a fixed unit or only the first lens group. AF cameras are now widely used, even for close-up photography. Consequently, demand has arisen for a focusing system that will keep the length of the lens unchanged while showing little fluctuation of aberration. In response to this demand, SIGMA has developed a new inner focus system that moves two lens groups inside the telephoto and telephoto MACRO lenses. This system has floating elements that substantially improve the close-up capability of the lens. The super wide angle lens having a large front-lens uses a rear focusing system to move the rear-lens apparatus and enhance the floating effect, and the 18-200mm F3.5-6.3 DC features an inner focusing system to move the secondary lens group during focusing. This lens has a minimum focusing distance of 45 cm / 17.7 inch throughout entire zoom range. The rear focus system ensures high-speed focusing with the APO 135-400 mm f/4.5-5.6 DG and APO 170-500 mm f/5-6.3 DG telephoto zoom lenses.

•Floating System
The floating system is used to control the focus. This system moves the

different lens groups in the optical system to different positions, thereby minimizing the telescoping distance and the fluctuation of aberration at different shooting distances. This system is particularly effective for macro lenses (which encompass a wide range of shooting distances) and wide-angle lenses (for Single-Lens Reflex cameras) whose lens composition is asymmetric. SIGMA uses the floating system for the MACRO 50 mm f/2.8 EX DG lens and the large-aperture wide-angle 28 mm f/1.8 EX DG ASPHERICAL MACRO lenses.

•DF (Dual Focus) System
The DF (Dual Focus) system disengages the linkage between the internal focusing mechanism and outer focusing ring when the focusing ring is moved to the AF position. This system provides easy and precise handling of the lens, since the focusing ring does not rotate during autofocus. The wide focusing ring also enables easy and accurate manual focusing.

•OS (Optical Stabilizer) Function
Developed with Sigma's own technology, the OS (Optical Stabilizer) function uses two sensors inside the lens to detect both vertical and horizontal movement of the camera. This function, which works by moving an optical image stabilizing lens group, to effectively compensate for camera shake, helps to set our lenses apart from the rest. APO 80-400 mm f/4.5-5.6 EX DG OS has two optical stabilizer modes. Mode 1 compensates for both vertical and horizontal camera movement, and is ideal for landscape or snap shots. Mode 2 compensates only for vertical camera movement, and is effective for panning with moving subjects such as motor sports. It is possible to select the Mode appropriate for the subject. 18-200 mm f/3.5-6.3 DC OS automatically detects movement of the camera and compensates for camera shake, when panning the camera for photographing moving subjects.

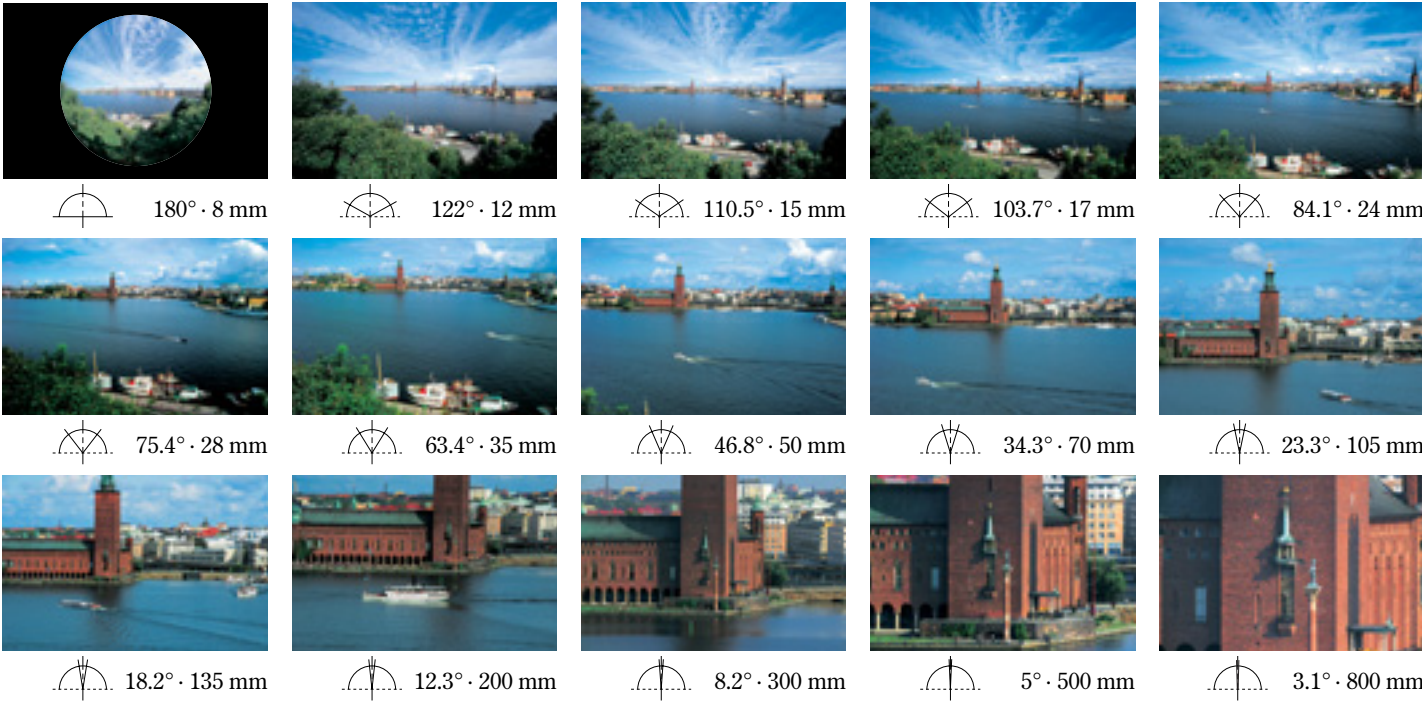

Camera shake correction mechanism OFF

Camera shake correction mechanism ON

ANGLE OF VIEW AND FOCAL LENGTH

PRINCIPLES OF THE LENS

•Angle of View
The focal length determines the area in which objects can be reproduced on the image sensor surface. The angle of view is the area that the lens can photograph and is expressed in degrees. The angle of view indicated in the brochure is the angle relative to the diagonal line of 36 mm x 24 mm and 20.7 mm x 13.8 mm frames. As the focal length becomes larger, the field angle becomes smaller and the image larger.

•f Value (f-Number; f-Stop)
The aperture settings of a lens are called f-numbers or f-stops. An f-number represents a ratio between lens focal length and the effective diameter of a given aperture. Because it is related to focal length, the f-number is also called the relative aperture. The f-number equals the focal length of the lens divided by the entrance pupil of the aperture. Aperture settings are marked so that each position changes the amount of light passing through the lens by a factor of 2: the light is either doubled, or reduced by one-half. That is, a high number represents a smaller aperture, one that stops twice as much light as the previous aperture. Conversely, a lower number represents a larger aperture, one that increases light twice as much as the pervious number. The speed of a lens is the f-number of its maximum effective diameter — i.e., when the aperture is wide open.

•Depth of Field
When you focus on an object, a certain area in front of and behind the object is also in focus; depth of field refers to the size of this area that is in focus. The depth of field or the range of focus becomes larger when you stop down (decrease the size of the aperture), or smaller when you open up (increase the size of the aperture). The depth of field is smaller at smaller shooting distances even when the aperture size remains unchanged, and is larger at larger shooting distances. The depth of field is also dependent on the focal length of the lens; it is larger for lenses of smaller focal lengths or wider angles, and smaller for lenses of larger focal lengths or telephoto lenses, if aperture and the distance camera to subject remain the same.

F2.8

F45

•Perspective
Depending on the focal length of the lens, the background appears close to or further away from the object. This visual effect is called perspective. With a wide-angle lens the background will appear remote, and the distance from the subject to the background will be emphasized; when the focal length of a telephoto lens is large, the background will appear to be closer to the object. To take advantage of this effect, use a wide-angle lens to capture both the background and the object, and a telephoto lens to emphasize only the object.

SIGMA LENS LINEUP & LENS ACCESSORIES

This line-up enables the photographer to express himself completely.
Sigma lens line-up including Tele Converters & lens accessories.

DC LENS

10-20 mm F4-5.6 EX DC
10-20 mm F4-5.6 EX DC HSM
Lens case and Petal type lens hood (LH825-04) supplied.

17-70 mm F2.8-4.5 DC MACRO
Petal type lens hood (LH780-04) supplied.

18-50 mm F2.8 EX DC MACRO
Lens case and Petal type lens hood (LH780-04) supplied.

18-50 mm F3.5-5.6 DC
Lens hood (LH630-02) supplied.

18-200 mm F3.5-6.3 DC
Petal type lens hood (LH680-01) supplied.

18-200 mm F3.5-6.3 DC OS
Petal type lens hood (LH780-04) supplied.

APO 50-150mm F2.8 EX DC HSM
Lens case, lens hood (LH732-01) supplied.

55-200 mm F4-5.6 DC
Lens hood (LH595-01) supplied.

30 mm F1.4 EX DC
30 mm F1.4 EX DC HSM
Lens case and Petal type lens hood (LH715-01) supplied.

ZOOM LENS

12-24 mm F4.5-5.6 EX DG ASPHERICAL
12-24 mm F4.5-5.6 EX DG ASPHERICAL HSM
Lens case supplied.

15-30 mm F3.5-4.5 EX DG ASPHERICAL
Lens case supplied.

17-35 mm F2.8-4 EX DG ASPHERICAL
17-35 mm F2.8-4 EX DG ASPHERICAL HSM
Lens case and Petal type lens hood (LH825-04) supplied.

20-40 mm F2.8 EX DG ASPHERICAL
Lens case and Petal type lens hood (LH875-02) supplied.

24-60 mm F2.8 EX DG
Lens case and Petal type lens hood (LH825-03) supplied.

24-70 mm F2.8 EX DG MACRO
Lens case and Petal type lens hood (LH875-02) supplied.

28-70 mm F2.8 EX DG
Lens case and Petal type lens hood (LH730-02) supplied.

28-70 mm F2.8-4 DG
Lens hood (LH630-01) supplied.

28-300 mm F3.5-6.3 DG MACRO
Petal type lens hood (LH680-01) supplied.

APO 50-500 mm F4-6.3 EX DG
APO 50-500 mm F4-6.3 EX DG HSM
Lens case, Petal type lens hood (LH935-01), shoulder strap and tripod socket (TS-31) supplied.

APO 70-200 mm F2.8 EX DG MACRO HSM
Lens case, Petal type lens hood (LH850-01) and tripod socket (TS-21) supplied.

APO 70-300 mm F4-5.6 DG MACRO
Lens case, lens hood (LH635-01) supplied.

70-300 mm F4-5.6 DG MACRO
Lens hood (LH635-01) supplied.

APO 80-400 mm F4.5-5.6 EX DG OS
Lens case, lens hood (LH840-01), shoulder strap and tripod socket (TS-31) supplied.

APO 100-300 mm F4 EX DG
APO 100-300 mm F4 EX DG HSM
Lens case, Petal type lens hood (LH890-01) and tripod socket (TS-21) supplied.

APO 120-300 mm F2.8 EX DG HSM
Lens case, lens hood (LH1134-01), shoulder strap and tripod socket (TS-41) supplied.

APO 135-400 mm F4.5-5.6 DG
Lens case, lens hood (LH835-01) and tripod socket (TS-21) supplied.

APO 170-500 mm F5-6.3 DG
Lens case, lens hood (LH925-01) and tripod socket (TS-21) supplied.

APO 300-800 mm F5.6 EX DG HSM
Lens case, lens hood (LH1571-02), shoulder strap, and circular PL filter supplied. It is equipped with a fixed type tripod socket.

SINGLE FOCAL LENGTH LENS

8 mm F3.5 EX DG CIRCULAR FISHEYE
Lens case supplied.

15 mm F2.8 EX DG DIAGONAL FISHEYE
Lens case supplied.

20 mm F1.8 EX DG ASPHERICAL RF
Lens case and Petal type lens hood (LH875-02) supplied.

24 mm F1.8 EX DG ASPHERICAL MACRO
Lens case and Petal type lens hood (LH825-03) supplied.

28 mm F1.8 EX DG ASPHERICAL MACRO
Lens case and Petal type lens hood (LH825-03) supplied.

MACRO 50 mm F2.8 EX DG
Lens hood (LH550-02) supplied.

MACRO 70 mm F2.8 EX DG
Lens case, lens hood (LH620-01) supplied.

MACRO 105 mm F2.8 EX DG
Lens case, lens hood (LH580-03) supplied.

APO MACRO 150 mm F2.8 EX DG HSM
Lens case, lens hood (LH780-03) and tripod socket (TS-21) supplied.

APO MACRO 180 mm F3.5 EX DG
APO MACRO 180 mm F3.5 EX DG HSM
Lens case, lens hood (LH780-02) and tripod socket (TS-21) supplied.

APO 300 mm F2.8 EX DG
APO 300 mm F2.8 EX DG HSM
Lens case, lens hood (LH1196-01), circular PL filter and tripod socket (TS-21) supplied.

APO 500 mm F4.5 EX DG
APO 500 mm F4.5 EX DG HSM
Lens case, lens hood (LH1236-01), shoulder strap, and circular PL filter supplied. It is equipped with a fixed type tripod socket.

APO 800 mm F5.6 EX DG
APO 800 mm F5.6 EX DG HSM
Lens case, lens hood (LH1571-01), shoulder strap, and circular PL filter supplied. It is equipped with a fixed type tripod socket.

TELE CONVERTER

CONV.

◆APO TELE CONVERTER 1.4x EX DG ◆APO TELE CONVERTER 2x EX DG
These are dedicated APO teleconverters that can be mounted between appropriate lenses and the camera body to increase the focal length by the power of 1.4 or 2 and are compatible with digital SLR cameras. They are also compatible with the lens autofocus function, depending on the open-aperture F value of the lens being used, and they work with the AE (Automatic Exposure) function, dispensing with complicated exposure calculations. They increase maximum photography magnification by 1.4x or 2x, without any variation in the minimum focusing distance. Compact and lightweight, these teleconverters convert your lenses into longer focal-length lenses, so you don't have to do a lot of unnecessary footwork.

◆SIGMA DG Filter

The new DG filters benefit from super multi-layer lens coatings, developed to counteract the highly reflective characteristics of digital image sensors, reducing both flare and ghosting. Black rimmed glass eliminates unnecessary internal reflections. New DG filters deliver high performance on both digital SLR cameras and film SLR cameras.

- The (D) symbol in the UPC code indicates a D type lens. (H) means an HSM type lens. Nikon mount (H) lens is also compatible with D type.

•*: Teleconverter; [*1] is capable of autofocus from 0.52m (20.5 inches) — infinity, and [*2] is capable of autofocus from 1.2m (47.2 inches) — infinity (corresponding AF mount : Sigma, Nikon, and Canon). Depending on the camera model some restrictions of functions may apply. Also, some functions may be restricted by certain models of camera bodies. •An asterisk (*) indicates the maximum magnification and the minimum

shooting distance when the built-in macro mode is used. •The minimum shooting distance is measured from the film surface. •The data for maximum diameter x length, weight and minimum aperture setting (f/-stop) was obtained using a SIGMA mount. •All SIGMA lens mounts are for Sigma lenses only and are fixed. They are compatible with all functions including AE programs. •Lenses of f/5.6 or smaller aperture cannot be

used for autofocus with the Nikon F-501 or F-401 (exceptions are the F-401S and the F-401X). •AF lenses have different appearances depending on the corresponding mount. •HSM equipped models of Nikon AF lenses allow auto-focus photography with Nikon Digital SLR cameras as well as Nikon F6, F5, F4 series, F100, F90, F90X, F80, F70, u2, u, PRONEA 600, PRONEA S, FUJIFILM FinePix S2 Pro, S3 Pro, S5 Pro, KODAK DCS

Pro 14n and DCS Pro SLR/n. In other cases, focusing is done manually. Lenses indicated with [*1] Nikon, [*2] Nikon and Pentax, and [*3] Pentax marks, show that these lenses do not have an aperture ring, therefore depending on Camera model some functions may not work. •An asterisk (**) indicates the filter for a type of lens that allows insertion of a gelatin filter into rear of the lens.

- If digital SLR cameras are used, the angle of view varies depending on the camera. •The appearance and specifications are subject to change without notice.

Caution: To ensure the correct and safe use of the product, be sure to read the User's Manual carefully prior to operation.
